

SCENARIO THREE

Below are some statements that directly affect BIPOC communities. These statements are either true or false. Think about what would be an appropriate way to handle each situation and decide on your own if the statement is true or false. Then discuss these statements with a friend or classmate to see if your answers were the same. Finally, talk about why these statements were either true or false.

1. If my BIPOC friends state a stereotype, it's okay if I repeat it.
2. I should stop myself from assuming that everyone in one race or culture is the same.
3. If my white friends say that they have permission from their BIPOC friends to repeat a microaggression, that means it's allowed.
4. Just because someone is the same race as another person, does not mean that they celebrate or show their culture in the same way.
5. I should always respectfully stand up to stereotypes that are being said.
